Internet Explorer 7

Open Internet Explorer >>
Click on the "Tools" button
in the toolbar.

Navigate down to Internet
Options and click.

The screenshot shows the Internet Explorer 7 interface. The 'Tools' button in the toolbar is highlighted with a black box. A callout box points to it with the text 'Open Internet Explorer >> Click on the "Tools" button in the toolbar.' Below the toolbar, the 'Tools' menu is open, showing options like 'Delete Browsing History...', 'Pop-up Blocker', 'Phishing Filter', 'Manage Add-ons', 'Work Offline', 'Windows Update', 'Full Screen', 'Menu Bar', 'Toolbars', 'Windows Messenger', 'Diagnose Connection Problems...', 'Sun Java Console', and 'Internet Options' (highlighted in blue).

Click the "Settings" button
in the "Browser History"
section.

The screenshot shows the 'Internet Options' dialog box. The 'Browsing history' section is highlighted with a black box. A callout box points to the 'Settings' button in this section with the text 'Click the "Settings" button in the "Browser History" section.' The 'Browsing history' section contains a description: 'Delete temporary files, history, cookies, saved passwords, and web form information.' and two buttons: 'Delete...' and 'Settings'.

Every time I visit the webpage

Click in the circle next to the “Every time I visit the webpage” section. This will put a green dot inside the circle. This will tell Internet Explorer to look for a new page every time you visit instead of pulling up old pages from cache.

Close off the internet for changes to take effect.
